WORK EXPERIENCE

C.G.G. CONSULTING 🌐

Principal & Lead Full Stack Web Developer | Jan, 2013 – Current

Work with a wide range of clients on projects to meet their business needs. Specialize in full-stack web development with an emphasis on responsive design, CMS integration, code efficiency, and reliable hosting through a range of Linux based stacks. Recent client work includes:

- **Love & War (New York, NY):** provide front-end and back-end Wordpress development and design for this well-known design firm on numerous projects including Westlight NYC, a New York Times featured restaurant and bar. Additionally, provide development and support for client websites including the William Vale Hotel, Springhouse Partners, and Mr. Dips bistro. Languages and tools used across projects: HTML, CSS (SASS), JS, JQUERY, PHP, WordPress, MySQL, Apache, Bootstrap 4, Node.js, Open Table API, WebM/WebP, git
- **FloatBit (New York, NY):** provide development, design, and advising for several large projects such as University of Texas Austin's McCombs School of Business website redesign. Additional projects include development of The Bungalow Santa Monica / Huntington Beach website, back-end Wordpress development for Abigail Kirsch catering and event management, and collaborative work on several other projects with multiple developers. Languages and tools used across projects: HTML, CSS (SASS), JS, JQUERY, PHP, WordPress, Drupal, MySQL, Apache, Foundation 5, git
- **Value IT (Paris, France):** provide front-end design and development, back-end Wordpress development, and server setup / maintenance for projects such as value-info.fr and several internal sites. Provide periodic server maintenance and content management. Languages and tools used across projects: HTML, CSS (SASS), JS, JQUERY, WordPress, MySQL, Apache, Bootstrap 4, Formspre, SVN
- **Droid Industries (San Francisco, CA):** provide front-end and back-end development and design for Droid Industries landing page, email templates, and email / chat support ticketing system. Additionally, provide content management and server administration. Languages and tools used across projects: HTML, CSS (SASS), JS, JQUERY, Bootstrap 4, Nginx, Digital Ocean VPS, Git

EAT SMPL L.L.C. 🌐

President, Founder, & Full Stack Developer | Jun, 2014 – Current

Eat Smpl is a service for restaurants, bars, cafes, and other food industry related businesses to get a website up and running. Eat Smpl gives business owners a responsive, modern, and SEO optimized site through an extremely quick and simple process much like a Mad Lib. Clients enter their business name, the site scrapes the internet for all the information it can find about it, and they just fill in the missing blanks. Responsible for all aspects of this start-up business, including conception, initial development, design, sales and marketing, maintenance, financial management, and more.

PROJECTS

DIAL UP

Creator

Dial Up is a W.I.P demonstration of how lightweight data management and machine learning can be applied to helping people find real world locations of interest. Using a lightweight JSON array information such as store locations, hours of operation, and user reviews can be sorted through and displayed rapidly and efficiently. Machine learning intelligently predicts locations of interest for users and displays them before even finishing a query.

TEEMWORK

Creator

Teemwork is a W.I.P service for t-shirt designers to boost their sales by relying on crowd-sourced digital marketing. Designers offer up a percentage of their profits to referral sales and can run campaigns which provide on demand printing and shipping.

LINE HOP

Creator

Line Hop is a W.I.P mobile first solution for helping small businesses handle online orders and payment. Specializing in cafes for the time being, Line Hop utilizes the brand new Android and Apple pay web APIs for handling payments on mobile browsers.
